# Standards and My Child's Classroom Learning

---

Student learning is best supported when goals are well defined. The model below shows how key parts of learning work together. The central focus, student learning, depends on curriculum, instruction, and assessment. The learning standards represent the overall knowledge and skills students need to learn by the end of each school year.

Standards “What do we need to learn?”	Standards are: <ul style="list-style-type: none"><li>x goals for New York State students</li><li>x organized by subjects and grade levels</li><li>x the learning intended to be accomplished by the end of a specific school year</li><li>x approved by the New York State Board of Regents</li></ul> Example of a Kindergarten Math Standard: Duplicate and extend simple patterns.
