2022

THE STATE EDUCATION DEPART/MENETUNIVERSITY OF THE STATE OF NEW YORK / ALBANY, NY 12234

Toolkit Overview

Summer learning and enrichment programs versus more traditional summer school programs offer opportunities to engage students and families in fun, creative, and educational programming that reinforces and enriches school year learning. As a result, participating students have a greater chance to sustain or improve well-being and academic learning, which can be especially impactful in minimizing inequities for students at risk of poor outcomes. This summer, following more than a year of interrupted and disrupted learning due to COVID-19, the benefits offered through summer learning opportunities are even more critical to student well-being and academic success. All our young people deserve the opportunity to thrive, and summer learning programs are a critical tool in making that possible.

The New York State Education Department Office of Student Support Services is pleased to announce that the Student-Centered Technical Assistance and Support (SCTAS) Team is available to offer technical assistance to public school districts with a focus on those districts receiving American Rescue Plan (ARP) State Reserve funds. With its robust array of educational experience, the SCTAS Team will highlight the use of best practices and evidence-based interventions while supplying technical assistance and support for:

Summer Learning and Enrichment Programs Comprehensive Afterschool Programming Integrated Social Emotional Learning Community Model Schools

The SCTAS technical assistance is focused on helping school districts achieve their identified goals, address areas of need, and highlight areas of strength and best practices while leveraging the ARP State Reserve Funds to support all students academically and emotionally through the trauma of the COVID

Targeted Intensive Tutoring	Often referred to as high-dosage tutoring, which consists of having the same tutor to work over an extended period (e.g., all year, every school day) on academic skills, such as math or reading.
	do main or roading.

<u>Summer Learning and Enrichment</u>: Planning and Implementation

Summer is a time for warm weather, sun, and community fun. It is also a time for students, school staff, and community members to engage in Summer Programming to offset learning-loss, recover credits, and engage in hands on stimulating activities. The purpose of this WRRONLW is to assist schools in the development and implementation of evidence-based summer learning programs while respecting the flexibility needed to create the most effective programs for their unique, local circumstances.

High quality summer programs provide a chance to help close opportunity gaps. Historically, the students who are hit the hardest by summer learning loss are students from marginalized communities and/or disadvantaged backgrounds (e.g., students of color, students from rural communities, English Language Learners, students with disabilities, families who live in impoverished communities). It is highly recommended that students from marginalized communities and/or disadvantaged backgrounds are targeted and prioritized when recruiting students and families.

Summer Programs are considered an allowable use of fu8 (ue)2. ugrawhe0r18pg(w)5 (he)mu12.91.97 3 Td [(I)-4.004 (t)6.0

Best Practices: Plannin g

Develop Recruitment Materials ‡The description of the model summer learning and enrichment program, the requirements, expectations for attending, and benefits of attending should be provided to students and families. In addition, there should be a protocol in place to ensure equitable recruitment of students into the program

Early Planning ‡A model summer learning and enrichment program is planned on a 12 month cycle with representation from all stakeholder groups. A planning tool that can assist with organizing, monitoring, and assessing the program is best practice

Needs Assessment ‡It is best practice to conduct a needs assessment in order to determine the social, emotional, and academic needs of students. The needs assessment will help identify the target student population, target grade level(s) and expected outcomes

Access to Programming

‡A model summer learning and enrichment program is free of cost, inclusive, full day, and incorporates programming that is supportive to all students and families. Free transportation and meals are also provided. Districts must create practices and procedures to accomodate all students, including students with special needs and those from marginalized communities

Targeted Programming

‡A model summer learning and enrichment program creates targets and goals aligned with HVWDE actacle it is a social emotional goals

Family, Students, and Community Voice ‡A model summer learning and enrichment program must reflect and elevate family, student, and community voices; taking their needs and assets into account while providing them with necessary resources to support learning and development

Hire and Retain Staff

‡Relationship building is criti Fal in model summer learning and enrichment programming. It serves as the foundation for creating a safe and supporting learning environment. Programs are encouraged to use necessary resources to U H F U X L Wodings and effective certified teachers and community members to
